This discussion and analysis should be read in conjunction with:

- The unaudited interim financial statements for 2019-Q1;
- The 2018 Annual Management report; and
- The Company's audited financial statements for the year ended December 31, 2018 and December 31, 2017.

These documents and additional information may be available through www.sedar.com web site, under the Company's section "Sedar filing" or at www.diosexplo.com. Dios' shares are traded on TSX Venture Exchange under DOS symbol and 74,906,606 shares were issued and outstanding.

Nature of activities

Dios is involved in mineral exploration in James Bay Eeyou Istchee, Quebec, along a major deformation zone through proprietary till sampling defining gold glacial dispersal trains. Successful drilling of large AU33 gold property led to HEBERTO GOLD discovery and most recently, some 4 km NNE, to successful first drilling of CLN area during this year ended. Very significant gold-silver-copper results were obtained on K2 project with Attila-Kali eastern targets and the new Farwest claims and west input targets, west of Kali intrusive, as well as on Clarkie gold project, along Eleonore mine - Cheechoo corridor.

During the quarter ended, Dios processed analysis and reviewed data to produce exhaustive geological reports on Clarkie, K2 and AU33 in order to file assessment reports with the Ministry of Natural Resources of Quebec for claim renewal.

Several different geological maps and research summaries and exploration reports were produced to plan the 2019 field exploration campaigns on these 3 flagship projects located along a major deformation zone in the Lower Eastmain.

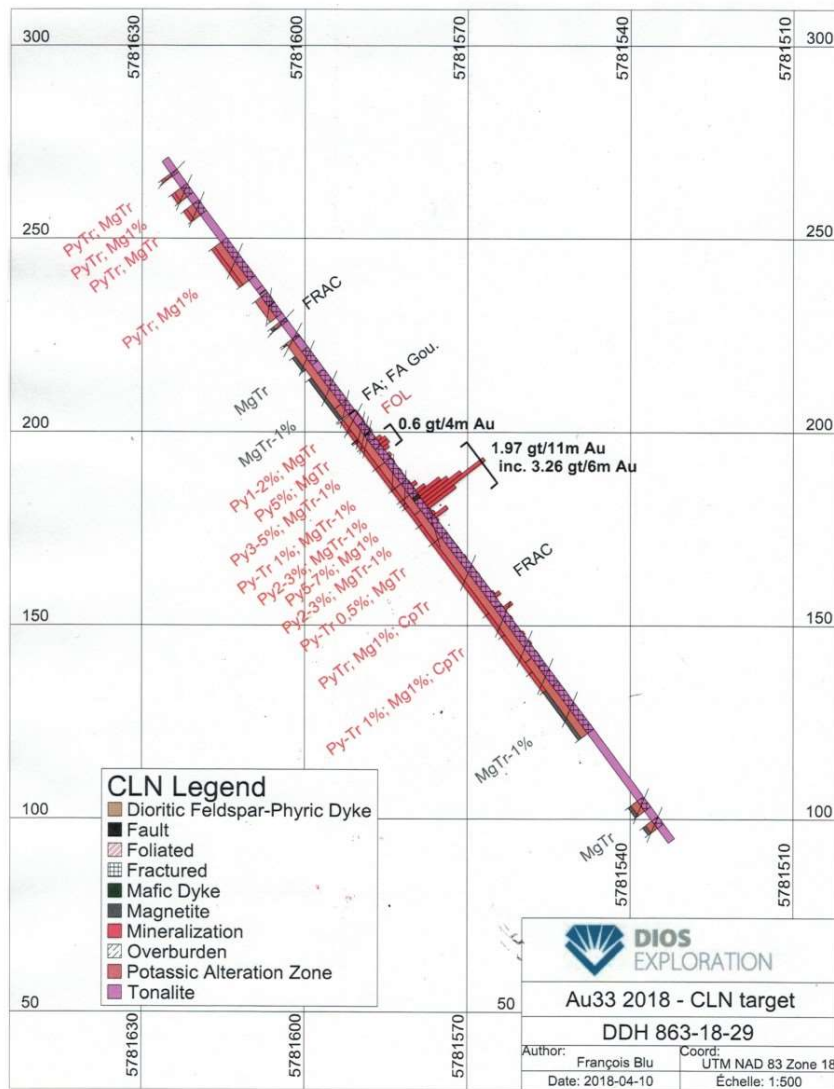

Access to facilities, lodging, transportation and exploration personnel has been secured for the field exploration season to start in the coming quarter. Dios' management is looking forward with enthusiasm for the next field season to start early and produce results and follow-ups.
